

# 2022 Port of Newport Annual Report

## Community & Economic Development

### **\$10,000 GRANT FOR CLOUD BASED APPLICATION**

OCWCOG awarded a \$10,000 grant towards a \$175,000 project that was completed in May of 2022

This project allowed the Port of Newport to switch from a local server-based application to a cloud-based financial application. Should a tsunami occur, a cloud-based application protects the ports financial records and makes them available to staff, which enables port staff to work with FEMA and insurance companies to quickly resume port operations. The first conservative analysis indicates the Port should recover the cost of upgrade in less than 2 years and be able to invest these savings back into Port operations, making the Port more sustainable over time.

### **ROUGE BREWERY SEAWALL PROJECT**

The Yaquina Bay Brownfield Initiative (YBBI) grant that OCWCOG received helped fund a Phase II Environmental Site Assessment of the Port of Newport Seawall project. The Port of Newport then received \$1.14 million to repair the seawall from the Oregon Legislature 2022 session.

### **COLLABORATION OPPORTUNITIES**

OCWCOG provides a variety of collaboration opportunities, including City Manager and Administrator meetings that the Port of Newport is involved in.
